Re: Florida Department of Environmental Protection (FDEP) File Number MI-493, Martin County Bathub Beach CCCL Permit Application, RAI #2 Response- Additional Information

Dear Mr. Gomez,

The package of responses to RAI #2 for permit application File No MI-493 sent March 6, 2009 did not include the complete granularmetric details of the sand samples presented in the RAI response. Two copies of these data, inadvertently omitted from the response package are enclosed with this letter. Please place the enclosed pages behind the Characteristics of Placed Sand” report (pages F1 and F2) in the three ring binder holding the RAI responses. I have also enclosed a CD with an electronic version of the new information.

Please contact Kathy Fitzpatrick, Martin County (772-288-5429, KFtizpat@martin.fl.us) or me (904-731-7040, dstites@taylorengeering.com) with any questions. If you email, please address your email to both of us.

Best regards,

David L. Stites, Ph.D.
Director, Environmental Services
